

See: Huawei opens service store in Sandton City

On 5 February 2022, Huawei opened its fourth store in Sandton City, Johannesburg. The store will not only sell Huawei's wide range of devices but also serve as a technical centre where consumers can learn about and experience Huawei's ecosystem.

Technical service offerings include software support, repairs, phone cleaning, and replacement of mainboards, screens, and batteries. The store's experience section allows visitors to see how Huawei's all-scenario ecosystem of products, from PCs to smartphones to wearables to audio devices, interact together to offer a superior user experience. Customers can also test the gadgets in the shop, such as play games on Huawei's new MateView GT curved monitor.
