

iFix and Hirsch open repair kiosk in Centurion

iFix, in partnership with Hirsch, has launched a walk-in, walk-out service kiosk, which offers clients an affordable, efficient and hassle-free way to deal with repairs and servicing of Apple, Huawei and Samsung devices.

The kiosk provides the same repair services as standard iFix stores and packs the same express service and quality parts iFix has become known for since its eight years of operation. With more than 25 stores in all major centres and over 439,071 successful device repairs, iFix is an experienced one-stop Apple, Huawei and Samsung repair and servicing destination.

The collaboration is geared to primarily cater for Samsung repairs, particularly in-warranty (ADH) repairs. Additionally, the kiosk will also provide the Apple repairs that iFix is known for, as well as support for Huawei devices.

Visit Hirsch's Centurion iFix kiosk at Gateway Plaza for efficient and affordable smart device repairs, or go to the [iFix website](#) for more information on their services and offerings.
