

Propak Cape to showcase latest in packaging, processing, printing and plastics

The Propak Cape exhibition, taking place from 24-26 October at the Cape Town International Convention Centre, will showcase the latest technologies and innovations in packaging and related industries.

Over 200 local and international exhibitors will be displaying their products, machinery, equipment, services and solutions across packaging, food processing, plastics, printing and labelling. Live demonstrations will enable visitors to see machinery and equipment in action.

"The packaging industry is driven by demands of consumers and latest global trends, which leads to innovative technology developments and product solutions to meet these needs. Many packaged products on the retail shelves are largely as a result of the collective food processing, packaging, plastics, print and labelling industries, which is why it's so important to showcase these industries together," state the event organisers.

Visitors will have the opportunity to source new products, find out about the latest trends and technologies, and meet new and existing suppliers. Expert advice will be available from technical specialists who will be on hand to discuss the right solutions for business growth. A series of free-to-attend seminars will host industry leaders who will be sharing their knowledge and expertise on a variety of important topics.
