

# Simplify your property management with Rentorr

Issued by [Rentorr](#)

13 Oct 2017

South Africa startup Rentorr's revolutionary service, built for renters, landlords, and contractors in SA, is expected to launch later this year, with [early signups now being accepted](#).

Rentorr's proprietary online software makes it easy for landlords to connect with thousands of potential tenants and real estate investors around South Africa, offering the following facilities:

- List property for rent, automatically syndicate and market property on major listing services
- Manage current property that's being rented, including all leasing prospect interaction and tenant applications
- Browse tenants who apply
- Perform comprehensive tenant screening including credit scores and background checks using Rentorr and Fraudcheck Score technology
- E-sign leases with tenants using built-in fully customisable lease templates.
- Accept payments from current renters, and manage rentals with online payment processing
- Track profit and instantly produce tax return information with a built-in accounting module
- Easily add renter's insurance to the lease
- Use the easy-to-browse contractor section when repairs or maintenance are required
- Connect with thousands of potential tenants and real estate investors around South Africa

## The screening processes

Tenant applicants will go through full screening, processed with FraudCheck Credit Check in combination with the FraudCheck ID online real-time verification to confirm that the ID number provided is valid and belongs to that person; Rentorr system will also check whether the marital status, the address given, the property ownership, current and previous employment history, and current valid bank details are all valid and up-to-date to provide the safe renting for South Africans.

Contractors also go through a full background check and provide basic information about their areas of expertise, location, and fees. Vetted and approved contractors will then be listed in the contractor section on the Rentorr website.

## How to get started

Once you receive your notification when the service is live, follow these easy steps to get started:

### 1. Sign up:

### 2. Select your preference:

### 3. Fill in some basic information:

4. View your dashboard and manage your properties:

This advanced, multi-platform application promises to make finding apartments quick and easy for renters, offers landlords advanced property management tools, and allows contractors to be hired instantly for a variety of repairs – simplifying apartment rentals for every involved party.
