

90 tattooers to showcase their inking skills at the 2019 International Tattoo Convention

The third annual South African International Tattoo Convention (SAITC) will be held at The Lookout at the V&A Waterfront in Cape Town from 29-31 March 2019. At least 90 tattooers from more than 15 different countries are expected to present their personal style of tattooing.

Each tattooer is inspired by over 15 genres of modern and traditional tattooing. SAITC has become a highly respected event among the international tattoo community and is recognised by international artists as one of the most highlighted events on the world tattoo convention calendar; the only one of its kind in Africa.

There is something genuine and special about this global meeting place of world travelling artists. It offers a high-quality tattooing experience in a professional environment where you will receive world-class advice and have a wide selection of tattoo styles to choose from.

The vibe always includes storytelling between travelling tattooers and clients alike, meeting people from all walks of life and getting to hang out, browse or even tattooed. Whether you are collecting a small memento-type tattoo from an artist's drawing sheet, looking for some fine art prints for your home or committing to a full day tattoo by your favourite artist, there is an unexplainable magic that happens when so many people come together to share the stoke and get tattooed under one roof.

The three-day show has upscaled their offering by introducing six live bands, three food trucks, an improved market area with fashion and lifestyle vendors, chocolatiers, coffee roasters, a fully kitted beer garden and a picturesque ocean view deck bar. Everyone is welcome and children of all ages are now able to attend.

To ensure you get a session with your favourite tattooer, head to the South African International Tattoo Convention website and book by emailing the artist directly before the convention and to start discussing the process, your design and tattoo placement. Find the Artist's Page [here](#).
