Eco-friendly board now fire-retardant

Xanita's eco-friendly board is now fire-retardant, allowing for this product to be specified for applications which require a fire-retardant classification. The board has been certified in accordance to the National Building Regulations as a component for ceiling applications (SANS 428), as well as a fire-retardant construction finishing material, in accordance with SABS 0177 Part 3 and DIN 4102. The board is fully printable and still retains all of the qualities that have made X-Board popular. For more information, go to www.xanita.com.
