

Cartrip provides added benefits for members, free of charge

Cartrip has decided to waive its fees and now provides its services free of charge. These services include management of the platform, banking fees, SMS and email fees, transaction management, moderation service, member support, web hosting, bandwidth, mobile applications, web development and data processing.

Cartrip is a platform that allows you to create a profile, post your ride and set your preferences (no smoking, etc); and people, willing to travel to the same location, will book seats in your car.

Visit www.cartrip.co.za or download the app on Google Play or the iStore for more information.
