Singer-songwriter Wendy Oldfield is back with a beautiful new single entitled "Home", which was released ahead of her new album *Salt* that set to be released in the second quarter of 2021.

"Home" is a rootsy exploration that finds Oldfield in a contemplative mood pondering matters of the soul further reinforced by Oldfield's unmistakable voice, and feel.

"The lyrics inquire the listener to ask what home means to them: 'Is it a place within, the walls in which we live within, is it the earth we're sharing?' It's all and everything; it's 'home'. Recognising a place that you call home makes it home; it's where you put your hands in the soil and your writing on the wall," says Oldfield.

"Home" is produced by Matthew Fink and features Martin Schofield of WonderBoom fame.

Readers should remember Oldfield as the lead vocalist of SweatBand. In 1983, Oldfield helped form Sweatband. The band released two albums. The group's biggest hit was "This Boy", which reached number 15 on the official South African top 20 in September 1986.

In 1988, five years after the formation of the band, she left the group and started her own solo career in the music industry.

Oldfield first rose to fame with the release of her debut solo album, *Beautiful World*. This album won her the 1992 Oktave award for Best Female Vocalist. Her song "Miracle" was nominated for Song of the Year.

Her song "Acid Rain" charted twice on South African radio, first in the original studio version and then in an "Acid Remix".

For a short while, she was involved with the band Mondetta (1999–2001), before releasing her fifth album *Holy Water*. At the ninth official South African Music Awards, she received a nomination for the Best of Adult Contemporary Award.
