

Yebo Radio

Was at Vodaworld at the weekend, must say, Yebo Radio sounds really cool and they have very cool DJs

I think Vodacom is planning to really pull the rug from under other radio station's feet. The sound of Yebo Radio is sort of a mix of 5fm and Highveld. The presenters or at least the one I heard seem to know what they're doing. I wonder how the station plans to broadcast to the masses though because it's still a retail radio station.
