

702 completes historic move

Talk Radio 702 officially moved to its new home on the FM frequency on Wednesday, 1 November 2006, when it launched its second, and biggest, FM transmitter in Pretoria at an outside broadcast and celebration at Church Square. The station is now available on 106.0 FM in the Pretoria area. This follows the initial migration to the FM band in July this year, when it began broadcasting on 92.7 FM in the Johannesburg area.
