

FlySafair now boasts fleet of 14 aircraft

FlySafair's total fleet is at 14 aircraft after it added two more Boeing 737 800s to it. The new aircraft will enter the airline's service in late March and late April this year.

The aircraft will contribute to an increase in FlySafair's capacity on the Johannesburg/Port Elizabeth, Johannesburg/East London and Johannesburg/Cape Town routes, as well as the Johannesburg/Durban route on weekends. This will increase the airline's overall capacity by more than 25,000 seats.
