With the brand spirit of challenging the norms, Infinix smart devices are designed specifically for young people who want to stand out, reach out and in sync with the world. Pre-installing Afrinolly, Android Developers Challenge Sub-Saharan Africa 2011 winner in the Entertainment category, stresses Infinix Mobility's commitment to the growth of locally developed applications.

With a reported over 2.3 million downloads across various operating systems, MTN Afrinolly allows users to watch trailers of movies produced in the African movie markets - especially Nollywood - and short films plus music videos as they are released daily. Users can also follow upcoming movies, favorite Nollywood celebrities and entertainment events from across Africa. The app also provides latest entertainment news, celebrity gist and gossip as it happens.

Infinix offers a wide range of Android smart devices like Surf Smart, Race, Race Lite, Buzz, Race Bolt and Joypad (Tablet). Infinix Smartphones and Tablet run on Android operating system, support both 2G and 3G networks and are powered with 1GHz above processors to allow consumers explore more with innovative applications.

The app is available for [download on Android via the Play Store](#).
