Learn how to create HTML5 apps for iOS Safari

By Nkululeko Mthethwa   8 Oct 2013

In the latest ebook, titled HTML5 iPhone Web Application Development and written by creative technologist, Alvin Crespo takes you through to the steps of how to create compelling web applications specifically tailored for distribution on iOS Safari.

With basic HTML, CSS and knowledge of JavaScript, you can now learn to create compelling software.

The first two chapters deal with really detailed code snippets which is convenient. The book comes with complete code used as real world examples in each chapter. THis ebook is useful for all levels of front-end developers using HTML + JavaScript + CSS.

This book reveals the true power of JavaScript, using with the "cherry on top" HTML5.

HTML5 iPhone Web Application Development can be downloaded at: http://www.packtpub.com/html5-iphone-web-application-development/book.
