

Google, Time launch Timelapse showing planetary changes over 25 years

By [Stuart Thomas](#)

13 May 2013

Google, Time Magazine, NASA and the US Geological Survey (USGS) have teamed up to create a portal showing how much the planet has changed over the past 25 years.

The interactive timelapse portal uses photos from NASA's Landsat programme collected over the past quarter of a century and highlights the impact humankind has had on places such as Dubai, the Amazon, Las Vegas and the Columbia Glacier.

Each section serves up a little information on the area, with a slider covering the time period and allows you to zoom in and out of them.
