

Glow TV available through new satellite channel

The eastern-inspired programme, Glow TV, will be available via an additional satellite bouquet, StarSat (on channel 570). It is already available via MultiChoice's DStv platform (channel 167) and OpenView HD (channel 108). Urban Brew Studios manage Glow TV.

Channel manager, Naz Khan says, "We're excited that through this move, it will be accessible to an even wider audience. South Africans, from all backgrounds, are becoming more enthusiastic about 'eastern' content. We believe the vibrancy, passion and family-centric nature of Glow's shows are alluring."
