New distributors for MD Lash Factor

MD Lash Factor is a lash enhancement conditioner created by Dr. Susan Lin of MD Laser & Cosmetics, and is now available through Pharmaplan in South Africa. Physician-formulated MD Lash Factor aims to improve the appearance and length of lashes.

Through Dr. Lin's research in scalp hair regeneration, specific cytokines and powerful anti-oxidants were discovered to benefit the scalp and eyelashes without using drugs or prostaglandin analogues.

MD Lash Factor ingredients

The key ingredients of the product are summarised as MD Lash Factor Nutritional Complex that is derived from milk. It is known to promote healthy lashes by enhancing the essential biochemical properties in the hair follicles.

Other ingredients of MD Lash Factor Eyelash Conditioner include Thiotane, which is a powerful amino acid that acts as a strong anti-oxidant and a shield against environmental pollutants, and Panthenol that moisturises the lashes making them fuller and thicker. Other vital ingredients of the newly improved MD Lash Factor are hydrolysed glycosaminoglycans, phenoxyethanol, sodium chloride, biotin, sodium lactate, alcohol, inositol, citric acid, sodium citrate, proline, and sodium phosphate.

There is no need for a physician's prescription to purchase this product and the product is paraben-free and hypoallergenic.
