

Reducing risk for recruiters

Identirisksa is a new recruitment product from Shane Meintjes, due to launch on 12 June 2008, that works in a similar way to ITC, where the person signs an indemnity at the start of proceedings. Before a candidate is interviewed, a simple check by name and id number on Identirisksa will show whether or not the person has been listed by another recruitment or HR company as a bad candidate. This does not mean that the recruitment company cannot proceed with any process with the candidate but at least they are aware of previous defaults and can act accordingly. For more information, go to www.identirisk.co.za.
