

# Variety of mining equipment to be auctioned by Clear Asset

Online mining auction house Clear Asset will be offering a variety of secondhand mining equipment during its next auction scheduled for 22 May.

Stock includes equipment from coal miner Exxaro, diamond miner Rockwell, various prime assets from Anglo Gold Ashanti and coal contractors Genet & Diesel Power. "Transparency and efficiency are key to the success of this business model," claims a regular bidder with Clear Asset. Bidders can access full images and due diligence of the assets directly from their own laptop with proprietary technology to ensure secure world class bidding.

This method of transaction continues to capture the interest of both buyers and sellers as they seek ease of access, ease of bidding and credibility in a system. Time is precious in today's economy, and dealers and end-users alike want to know upfront if the assets listed are of interest to them. Thereafter they can still make arrangements to physically inspect to validate their initial search.

## Professional experience

"By being able to view all assets online, down to name of seller, location, even service meter reading and serial number with supporting photographs, the experience becomes far more professional. It is about market intelligence, and proactively engaging with our clients once they know what they are looking at. As such, the bidding experience becomes far more attractive than having to travel to the site and wait all day to bid," says Clear Asset MD Ariella Kuper.

During the upcoming Clear Asset auction bidders can expect to find a vast array of CAT equipment, namely 16H, 16G, 14G graders, 777Ds dumpers, 920 FEL, D8N dozer, and 325 excavator. Strong sellers also include Volvo A30 & A40 ADTs, L120 FEL and from Komatsu, a D155 and D375 dozer, WA470-5 & WA430-5 FELs, PC800-7 excavator, and a 714H forklift amongst MAN trucks and Bell equipment.
