

Most fuel-efficient double-cab bakkies in SA

By [Gero Lilleike](#)

12 Jul 2018

Looking for the most fuel-efficient double-cab bakkies currently on offer in South Africa? Here they are...

Double-cab bakkies serve multiple purposes in South Africa. They are workhorses, but they are also family vehicles used for a wide variety of leisure activities and they are often seen clambering up rocky mountain roads or towing boats and other leisure vehicles and accessories.

Most fuel efficient diesel cars in SA (2018)

[Gero Lilleike](#) 8 Jun 2018

For the average double-cab bakkie buyer in South Africa, outright capability is sometimes more important than fuel efficiency, but if you consider that these vehicles often commute within the city too, then fuel efficiency becomes more relevant.

After all, fuel efficiency has a direct impact on the overall cost of ownership of the vehicle and it should form part of your decision-making process when you are looking to buy a double-cab bakkie.

Note that this list is determined according to claimed manufacturer fuel consumption figures. In the real world, consumption will vary depending on factors such as driving style, load, road and terrain conditions and so forth, so consider this a guideline.

1. Nissan Navara 2.3D Double Cab SE/LE - 6.3L/100km

□

The Nissan Navara is currently the most fuel-efficient double-cab bakkie on offer in South Africa.

The Navara is powered by a 2.3-litre turbodiesel engine with 140kW and 450Nm of torque on offer. The six-speed manual Navara in SE and LE trim are the most efficient derivatives available with a claimed fuel consumption figure of 6.3L/100km.

The 4x4 derivatives are slightly thirstier with a fuel consumption figure of 6.5L/100km. Pricing for the Nissan Navara starts from R461,900.

The #AllNewNavara is all that and more

2. Ford Ranger 2.2 Double Cab Hi-Rider / XL / XLT and 4x4 XL/ XL-Plus/XLT/XLT Fx4 – 6.9L/100km

□

The Ford Ranger is a popular choice locally and if efficiency is a priority for you then you have two versions of the 2.2-litre turbodiesel engine to choose from, both claiming to consume 6.9L/100km.

The entry-level 2.2-litre turbodiesel engine produces 88kW and 285Nm of torque in the Ranger 2.2 Double Cab Hi-Rider priced at R325,700.

The more powerful 2.2-litre turbodiesel engine offers 118kW and 385Nm of torque and is available in the Hi-Rider XL (R403,900), the Ranger 4x4 XL (R445,500), 4x4 XL-Plus (R460,600) and the Ranger Hi-Rider XLT (R491,990) and Hi-Rider XLT Fx4 (R507,100).

3. Toyota Hilux 2.4GD-6 4x2 SRX – 7.1L/100km

□

If you are looking for an efficient Toyota Hilux double-cab bakkie, then the 2.4GD-6 4x2 SRX derivative is a good starting point. Its 2.4-litre turbodiesel engine produces 110kW and 400Nm of torque while returning a claimed fuel consumption figure of 7.1L/100km. Pricing for 2.4GD-6 SRX double cab starts at R442,700.

If 4x4 capability is what you're after, then the 2.4GD-6 4x4 SR and SRX are priced from R474,400 and R487,300 respectively, but fuel consumption increases marginally to 7.3L/100km.

4. Mitsubishi Triton 2.4 Double Cab 4x2 - 7.1L/100km

□

The Mitsubishi Triton has proven itself to be a product well worth consideration in the local market. This is largely due to its 2.4-litre turbodiesel engine, new styling and improved ride quality.

The Triton packs 133kW and 430Nm of torque. In 4x2 manual guise, Mitsubishi claims a fuel consumption figure of 7.1L/100km for the Triton and if you are after a 4x4 manual, consumption will increase slightly to 7.3L/100km.

The Triton 4x2 manual is priced at R479,995 while the 4x4 manual version is priced from R539,995.

5. Mercedes-Benz X220d Progressive - 7.5L/100km

□

The new Mercedes-Benz X-Class makes it onto this list with the X220d Progressive (R646 071) claiming a fuel consumption figure of 7.5L/100km.

This derivative is powered by a 2.3-litre turbodiesel engine with 120kW and 403Nm and mated to a six-speed manual transmission powering the front wheels. The more powerful 140kW/450Nm X250d 4Matic Progressive (R701,615) and X250d 4Matic Power (R796,145) derivatives consume marginally more fuel with a claimed figure of 7.7L/100km.
