

Sava expands light truck tyre range

Sava, one of the brands in Goodyear's product portfolio, has introduced Trenta 2, its latest model in the light truck tyre range. With the launch of this new tyre, the company offers an efficient and reliable tyre and expands its range to provide fleets with additional size options.

The Sava Trenta 2 is designed to respond to fleet managers' needs: improving mileage, fuel efficiency and durability - ensuring a long lifespan, lower cost and reliability. The tyre also offers an excellent performance on wet roads for a safety-conscious purchase.

Features and benefits:

The multi-radius tyre contour generates a long and wide footprint with even pressure distribution between the tyre and road, resulting in high mileage. The solid outside blocks are straight and robust, delivering better force transfer capability compared to its predecessor. This, in turn, offers confident dry handling and braking with heavily loaded vehicles.

Strong reinforced edges increase the grip on wet roads, even with a heavily loaded vehicle. The circumferential grooves

are at an optimal position to absorb and disperse water out of the tread quickly, resulting in excellent contact on wet roads.

Available sizes

- 205/65R16C 107/105T TRENTA 2
- 205/75R16C 110/108R TRENTA 2
- 205/R14C 109/107P TRENTA 2
- 215/75R16C 113/111R TRENTA 2
- 225/70R15C 112/110R TRENTA 2
- 185/R14C 102/100R TRENTA 2
- 195/70R15C 104/102R TRENTA 2
- 195/75R16C 107/105R TRENTA 2 NEW
