

Intel, Mobileye deal to make Israel autonomous tech hub

 By [Ilse van den Berg](#)

15 Mar 2017

NEWSWATCH: Intel is buying Israeli autonomous vehicle technology firm Mobileye for an estimated \$15 billion - reportedly its second-biggest acquisition and a bold attempt to dominate technology for self-driving cars.

The US chipmaker will pay \$63.54 per share in cash for the Jerusalem-based Mobileye, according to a statement from both companies.

According to a report on Bloomberg Technology, Prime Minister Benjamin Netanyahu said in a text message: "Israel is becoming a global technology centre, not only in cyber but also in the automotive area."

Israel had reportedly already singled out the automotive technology sector as a possible economic boon, allotting it 250 million shekels (\$68 million) for the next five years.

In this video, Intel CEO explains the move to buy Mobileye:
