

Aspen's APC software for Refining Technology Africa 2012

4-traders.com website reports that Aspen Technology, Inc. announced it will present the benefits of Advanced Process Control (APC) at Refining Technology Africa 2012 in Sandton, South Africa, 27 - 28 of November 2012.

AspenTech is a leading supplier of software that optimises process manufacturing - for energy, chemicals, engineering and construction, and other industries that use chemical processes to manufacture and produce products.

AspenTech will also show how its aspenONE Engineering, Manufacturing and Supply Chain software improves production and profitability. Heads of refining and petrochemicals, chief engineers, and downstream and upstream advisers will attend Refining Technology Africa 2012, reports *4-traders.com*. The conference will provide insights into the latest innovations and proven technologies, modernisation of refineries, optimisation of operations and future directions for refining technology in Africa.

AspenTech's presentation will highlight how using APC software can achieve immediate results for African companies -- optimising their operations to meet growth targets and making a significant positive impact on bottom line results. Aspen process control software is used by world-leading companies in engineering, manufacturing and supply chain operations, *4-traders.com* website says.
