

Nashua's uncapped, unshaped Internet connection

Business Live reports that Nashua is now offering a range of uncapped and unshaped and inexpensive Internet connections aimed at users who want to download media, watching streaming video, play games online or run an efficient home office.

According to *Business Live*, the new services are available at standard ADSL speeds of 384, 1024 and 4096kbps and allow two simultaneous connections. The basic uncapped and unshaped service of 384kbps will cost R219 for data and R369 including the line rental.

The 1024kbps service is R499 for data and R779 including line rental while the fastest 4096kbps uncapped connection is R549 for data and R949 including the line rental.

All prices are dependent on a 12-month contract.
