

TowerXchange Meetup Africa 2018

Returning for its sixth year, the TowerXchange Meetup Africa brings together the who's who in the African tower and passive infrastructure industry.

The continent's most focussed gathering of tower owners, towerco leaders including IHS Towers, Eaton Towers and Helios Towers (who own over 34,000 towers between them) will be joined by exciting new independent towercos and top MNOs from across the region.

What's more, for 2018, we're excited to announce an expanded infrastructure focus: meet fibrecons, satellite companies, in-building solution providers and key experts and examine how passive infrastructure and the role of the infraco will evolve for tomorrow's networks.

Don't miss:

- Keynote panels with MNOs, towercos and infracos sharing business strategies and investment plans
- 40+ interactive and focussed roundtable discussions examining everything from innovative tower designs and optimisation of power systems to M&A activity, financing and new infraco models for 5G
- VIP buyer briefings: the continent's top MNOs and towercos explain technology and service requirements and upcoming RFPs
- ESCO spotlight: meet the growing number of ESCOs and examine the role the model will play in the future of the African telecoms sector

Date: 09 October 2018 to 10 October 2018

Time: 08:00 - 16:00

Venue: Sandton Convention Centre, Johannesburg
