

SA to import up to 1,000MW of electricity from Mozambique

South Africa has signed a Power Purchase Agreement with Mozambique that will see SA importing 100 megawatts (MW) of electricity within the next three months from its neighbour and up to 1,000MW over the next 12 months.

Cabinet also welcomed a donation of emergency and small-scale generation equipment from China, valued at R167m.

“A deployment plan is being developed to ensure the donated equipment is installed in public facilities which will, as a result, be isolated from load shedding. A formal handover ceremony will take place as soon as the goods are cleared by South African customs authorities,” cabinet said.
