

Recycled products available at Cavendish pop-up store

Focusing on the World Design Capital 2014 theme 'Today For Tomorrow - sustainable solutions for people and planet', Cavendish Square in Cape Town partnered with local green designers, Pitchulik, WREN, NEWCO and Give It Bag.

The aim of the Made by You & Cavendish recycle bin monsters that were launched in August was to transform the centre's waste into designer products and shoppers had to 'feed' the monsters paper, plastic, tin and glass waste.

The waste produced and recycled in the centre by shoppers over the past three months was crafted into beautifully designed, functional and desirable recycled products. Through this initiative the centre's shopping community in fact contributes to the creation of the products by the designers.

The recycled products will be available at the Made by You & Cavendish Recycle Pop-Up Store, created specifically for this project. The store will be operational during October and will be located in Col'Cacchio court on the lower ground floor, operating from 10am-5pm daily.
