

COP21: A turning point?

By [Obinna Anyadike](#)

30 Nov 2015

NAIROBI: The science is clear. It's the deal, as ever, that's complicated.

The Paris climate summit is one more chance, from an ever dwindling store, for the world to agree and implement the tough actions needed to keep global warming at below 2 degrees. Any higher, and we're in serious peril.
