

Sober Up - Keeping your mind and body alert!

Issued by [Sober Up](#)

15 Nov 2012

Sober Up is Biogreen Technologies' first in-house product. An innovative, exciting product, promoting human health and general well-being in SA, thanks to Triclyst. Presented as a premium product in trendy packaging, it's fast becoming a popular choice.

Sober Up is formulated with Triclyst Technology which is a consortium of naturally occurring micro-organisms that symbiotically generate a wide range of enzymes, probiotics and non-enzymatic cofactors. A powerful composite biocatalyst, Triclyst speeds up selective bio-chemical processes within the body. It is 100% natural and a fundamentally different approach to metabolic activation. Triclyst technology in human health has proven to promote good cholesterol as well as provide potent anti-oxidant and anti-inflammatory properties. Triclyst also helps to reduce visible signs of ageing, improve stamina and strength, as well as naturally reducing body odours, bad breath

and relieves the effects of alcohol induced hangovers.

The Key Attributes of the Product:

- **Reduction of alcohol from the body**
- **Relieving hangovers**
- **Digestion**

With December and the festivities rapidly approaching, using **Sober Up** will assist South Africans to be more socially responsible after a day or night of over indulgence!
