

SatLink to distribute Ethiopian news channel

SatLink Communications has been appointed by the Ethiopian Radio and Television Agency (ERTA) for the global distribution of its government-owned ETV news channel which goal is to broadcast informative, educating and timely information of the development of Ethiopia.

The partnership will reportedly result in the channel extending its audience reach over SatLink's Global Satellite and Fibre Network across Africa, North America, Europe and the Middle East.

According to [a report on Screen Africa](#), SatLink will broadcast ETV to the African market utilising SatLink's capacity on AMOS-5 C-band, which will enable ETV to effectively distribute its content to the continent's multi-channel platforms.
