Crop insurance

TWK's crop insurance division focuses on minimising crop clients' risk at the best possible rates. TWK's wide network of crop insurance brokers and crop agents have access to all the crop insurers, in order to provide clients with comparative quotes and cover options. With the backing of the credit department, TWK offers crop clients unique payment structures for the payment of premiums. This division also includes an assessors' corps to assist clients with crop claims and to ensure that their claims are handled in a fair and effective manner.

Plantation insurance

In addition to short-term and crop insurance, TWK's short-term brokers are also fully accredited to provide clients with plantation insurance solutions. This cover mitigates risk against fire and allied perils pertaining to the plantation industry, including harvesting costs, debris removal and aerial water-bombing costs.
