

Jabra introduces a UC-dedicated headset series

The worldwide user adoption of unified communications (UC) is projected to grow at a rate of 600%, from approximately 7.8 million today to 49.5 million users, by 2015. Furthermore, as more companies deploy UC there is a growing realisation that audio plays a vital role in the success of the UC deployment and in line with this Jabra has launched the Jabra UC VOICE series, which comprises of four new cost-effective UC-dedicated headsets.

"The Jabra UC VOICE series is designed to simplify the deployment of UC and make it easy for first-time users of UC voice applications to get started. These UC optimised headsets are a small investment that will bring fast returns from the start," says Scott Corry, business unit manager for Jabra at Kathea.

Strategic development

In addition to headset solutions, for light to heavy users, the Jabra UC VOICE series features a portable headset - the Jabra UC VOICE 250 - developed for virtual offices that is a corded UC headset with a behind-the-ear wearing style and discreet form factor for video conferencing.
