

Updated M Series from Acer

Acer has overhauled its Aspire M Series Ultrabooks to offer 10-point touch, frameless HD display, latest Intel Core processor and 8+ hours battery life in a slim package, ready to support Windows 8.

The Aspire M3 is the first Acer Ultrabook to pack a next-generation NVIDIA GeForce GT640M GPU to enjoy the latest graphics-intensive games with ultimate detail, smooth curves and lifelike animation; suitable also for streaming of Internet video and movies. It offers Dolby Home Theatre v4 audio enhancement and premium speakers.

It includes Acer Green Instant-On, which springs to life and resumes from sleep mode in just 1.5 seconds. In addition, Acer Instant Connect reconnects to favourite access points in 2.5 seconds.

Encased in a dark chassis made of aluminium alloy to increase durability, it houses a responsive Chiclet keyboard with a numeric keypad for a fast and comfortable typing experience, while the oversized touchpad offers more precise control. The built-in battery seamlessly integrates in the design enhancing its minimalist modern look.
