

INFORMATION SECURITY SURVEY 2018

In 2018 SearchInform held a number of seminars conducting Road Show in 4 regions worldwide. South Africa, the Middle East and North Africa, Latin America and CIS have taken part in the annual anonymous survey presenting the relevant level of data risk awareness and expertise from across 10 industries, including IT, power engineering, manufacturing and transport, finance and banking, retail, hospitality, healthcare, state defense, logistics and construction.

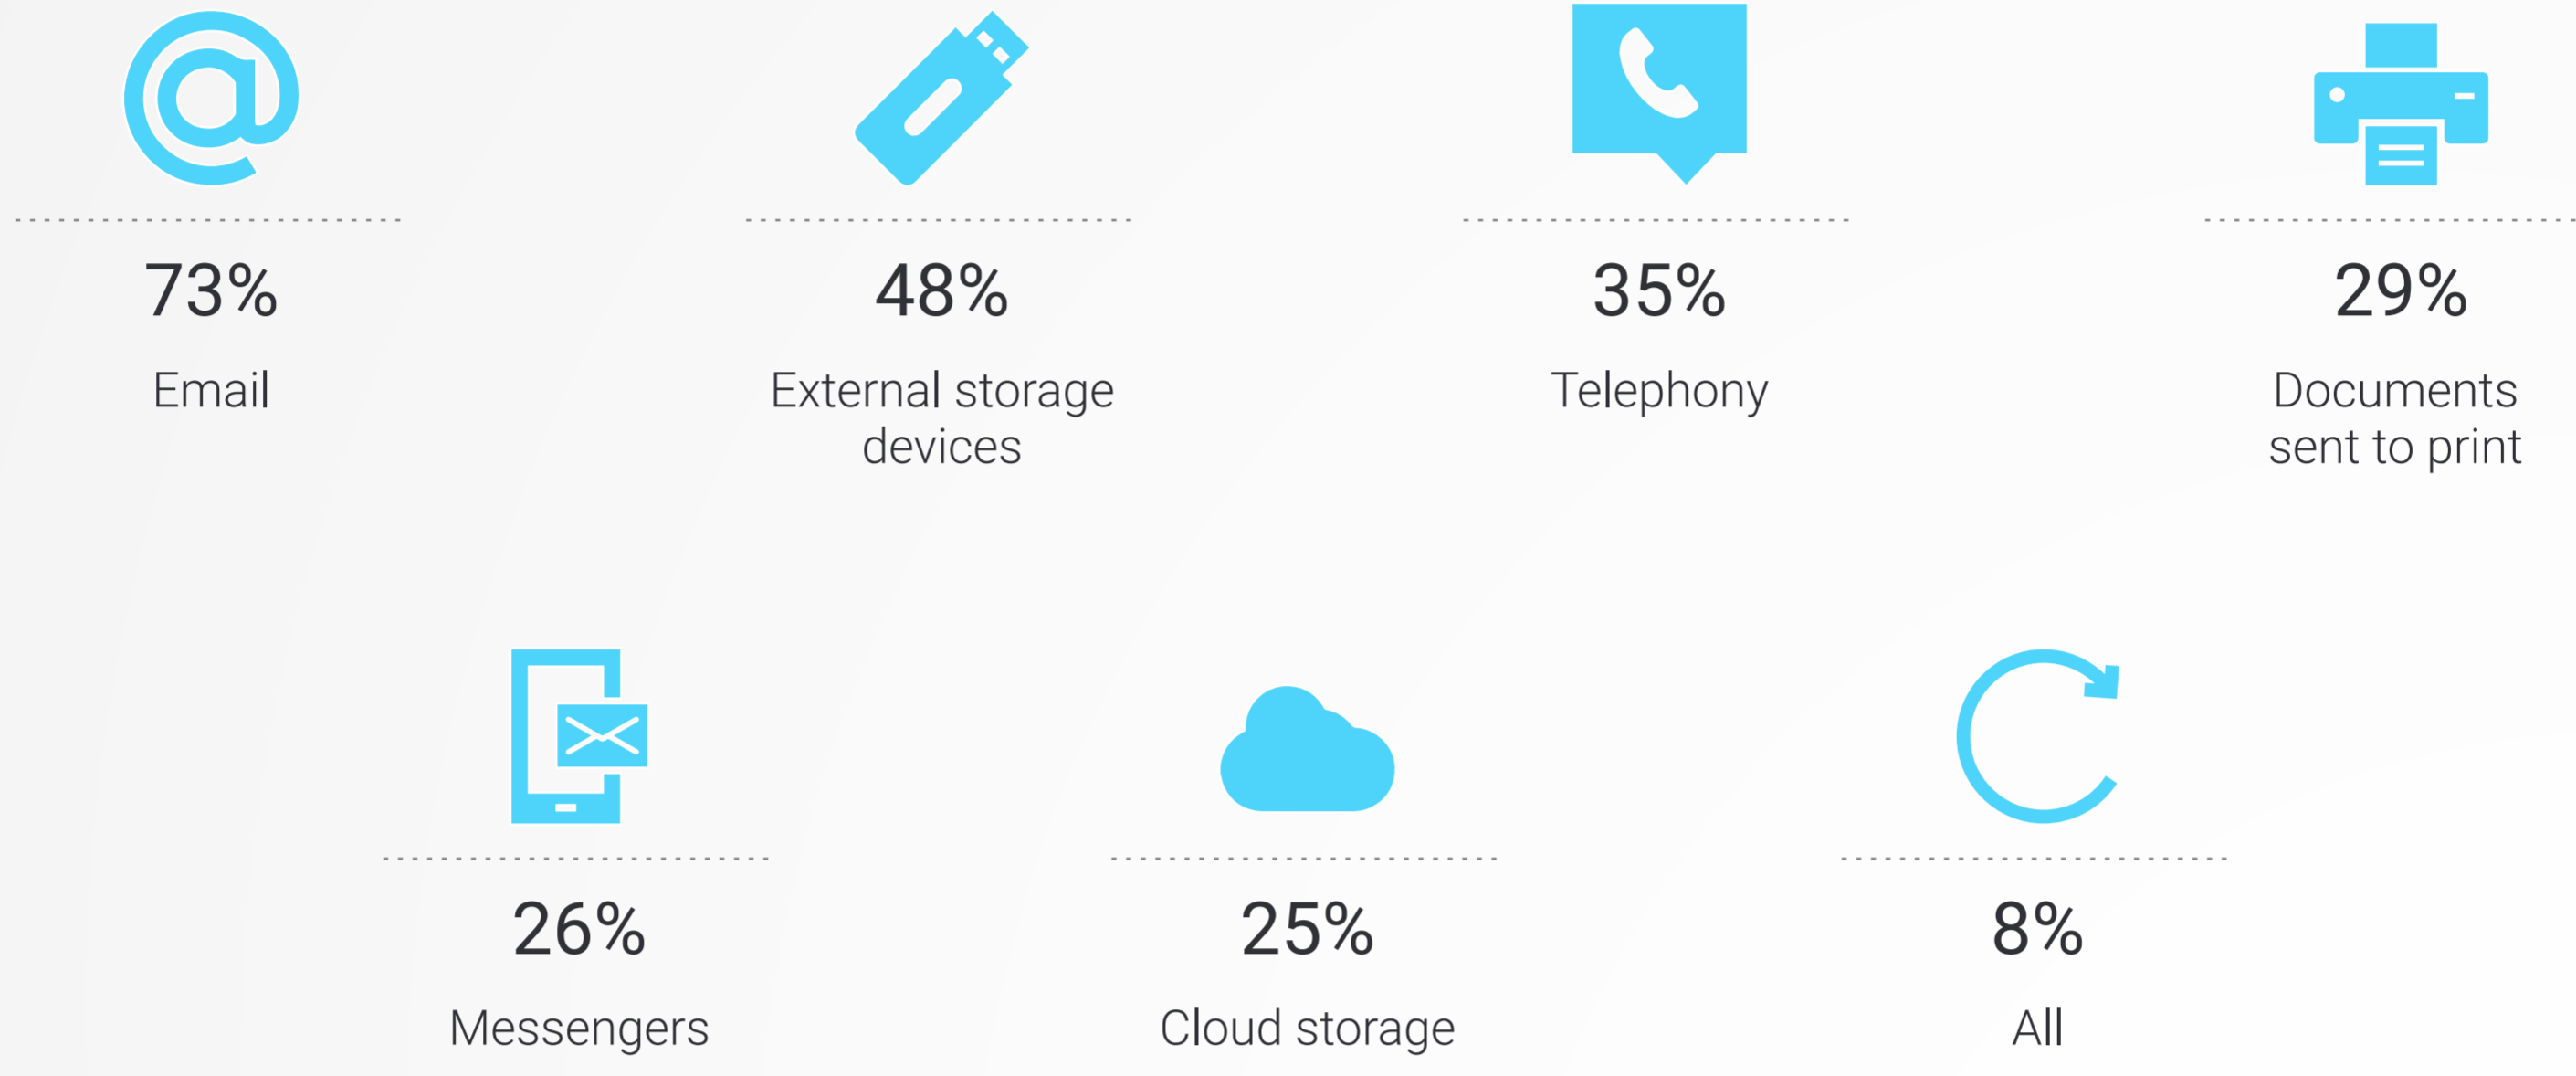

15 countries have shared their experience and methods introduced to protect the corporate network

WHICH SOLUTIONS ARE INSTALLED TO PROTECT A CORPORATE NETWORK

WHICH CHANNELS ARE CONTROLLED

WHICH INFORMATION WAS LEAKED IN 2017-2018

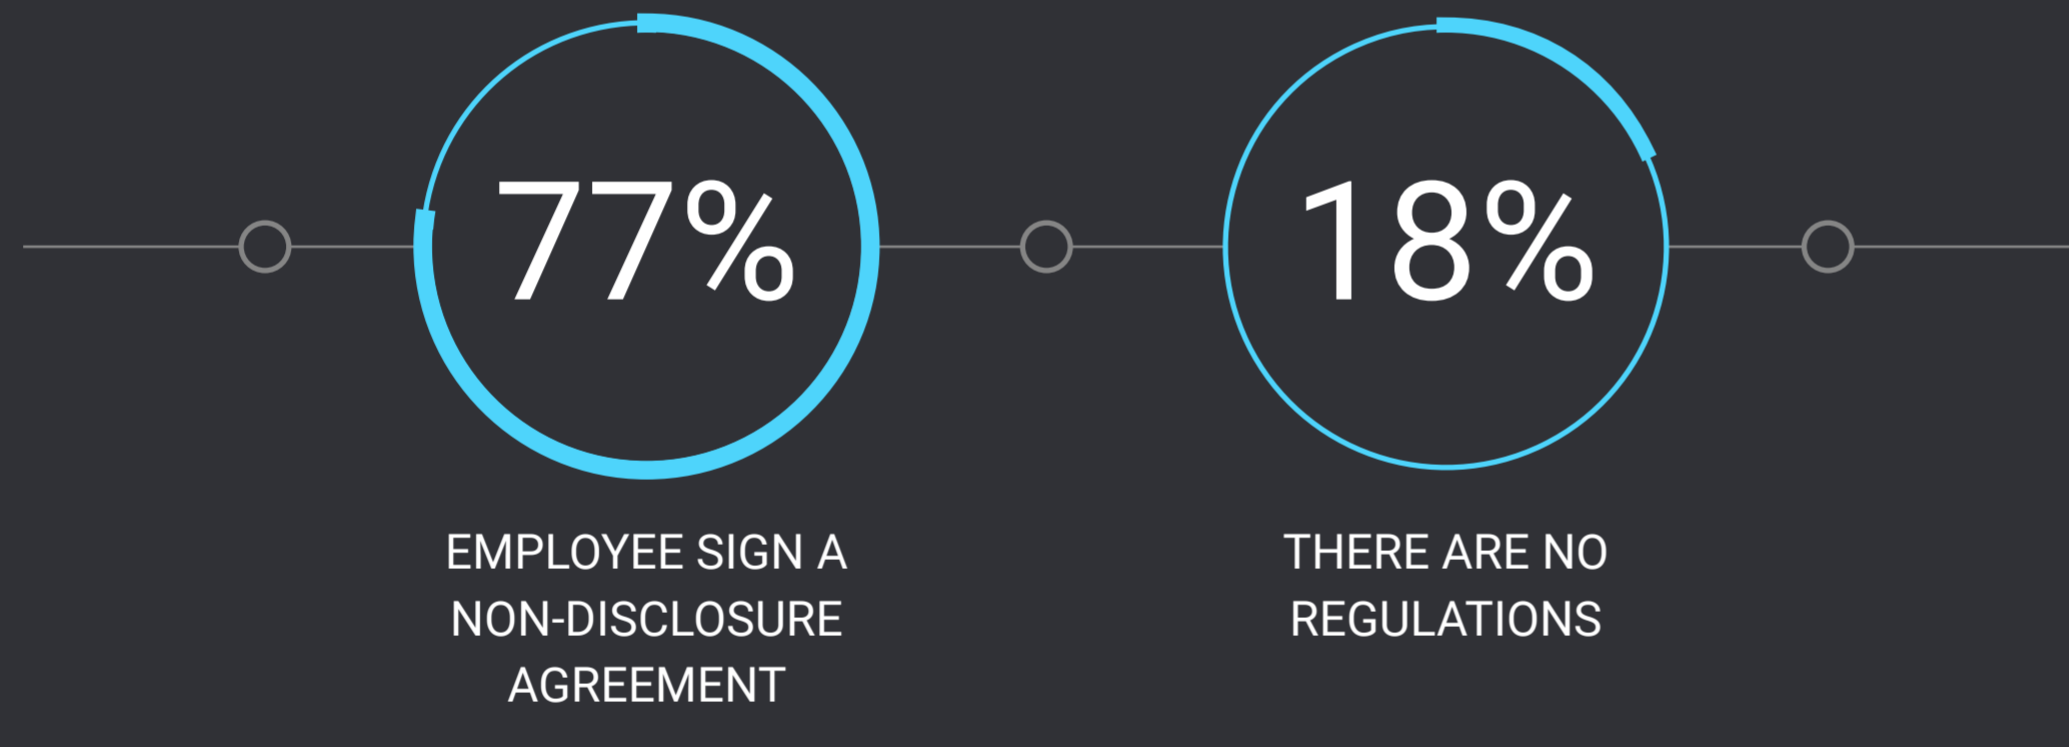

WHO APPEARS TO BE A VIOLATOR

WHICH SANCTIONS ARE IMPOSED

ARE THERE ANY CORPORATE REGULATIONS INTRODUCED

DO CLIENTS OR MEDIA SOURCES GET INFORMED ABOUT A LEAK?

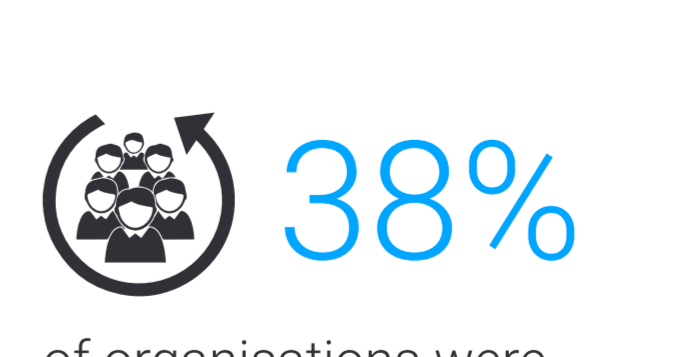

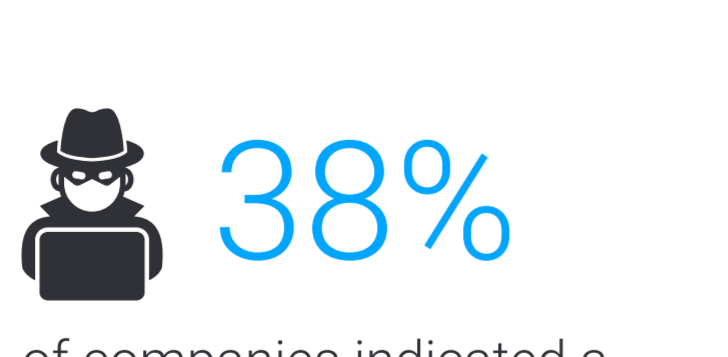

THE NUMBER OF LEAKS INCREASED IN 2018

62% and 68% of South African and MENA countries' companies accordingly don't have a specific department monitoring information usage and assign IT officers to manage data safety issues

SOUTH AFRICA IS THE ONLY COUNTRY SHOWING EQUAL DATA LEAK SCORE DUE TO INTERNAL AND EXTERNAL VIOLATIONS

Human factor is identified as the biggest threat according to the respondents representing each of the regions which participated in the survey, and Latin America shows the highest percentage

“ Alexei Parfentiev, leading analyst at SearchInform
 We observe the willing of managers to foreknow a problem, to understand the incentives, the reasons which make employees compromise corporate assets. And it is not just about monitoring loyalty issues – negative feedback and sabotage. Employers seek to comprehend the problems of their staff members, to recognise situations which might undermine the wellbeing of the colleagues and interfere with business processes: drug or gambling addiction, extremism. Such an approach has a positive effect on a company's internal workflow and increases the level of security in the regions.
